DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15 and 53-66, drawn to a method or computer program product for the processing bioinformatics data involving analysis, and compensating data suppliers, classified in class 705, subclass 1.
- II. Claims 16-38, drawn to a method or system of providing bioinformatics data by supplying said data to a clearinghouse, accepting compensation based on the function of use of the bioinformatics data, classified in class 705, subclass 28.
- III. Claims 39-52, drawn to a bioinformatics clearinghouse, classified in class 707, subclass 102.

The inventions are distinct, each from the other because of the following reasons:

The inventions of Groups I and (II and III) are distinct because Group I only requires the accepting of data with analysis and compensation of suppliers whereas Groups (II and III) require some type of data storage for clearinghouse practice. Such clearinghouse practice requires some type of organization and accessing with search capability from what may be a large database which is not a limitation in Group I. Therefore, the undue search burden of searching these two Groupings together is clearly supported.

Inventions of Group III and Group II are related as product and process of use, respectively. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the clearinghouse of Group III may be utilized in the distinct usage of the Group II practice as well as a research facility itself for information stored therein.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CFR § 1.6(d)). The CM1 Fax Center number is either (703)308-4242 or (703)305-3014.
